

Option Module full time MBO4

Just like in HBO where minors are used also in MBO4 there are optional modules.

For a two-year MBO4 course, optional components must be followed for a study load of 720 hours.

The full time student can choose from the options:

- K0165 Enterprising study load 480 hours
- K0843 Preparation Havo Economics study load 480 hours
- K0098 Spanish in the Professional Context A2 (all directions) study load 240 (upgrade to B1 possible which represents another 240 hours study load)

The options are offered in a configuration. This means that all students make a combination with the Enterprise section and another option module.

The Entrepreneurial option describes the professional knowledge, skills and tasks of a small independent entrepreneur who starts and / or runs a business. This can be a company in all kinds of areas and in different sectors. The entrepreneur described does not, in principle, have any staff / is a freelancer and can run his business at the local, regional, national and international level. He runs the company in accordance with his plans, constantly responding to his environment. As the owner of his company, he himself determines the scope and organization of his work. The sector / branch in which the company is conducted also gives direction and content to entrepreneurship.

The optional part preparation HAVO economy is intended to optimally prepare a student for obtaining a HAVO certificate for the economics course.

The optional part Spanish in the professional context is focused on applying Spanish in the professional context ". In terms of language level, it is about basic knowledge of Spanish in order to be able to cope with standard situations in the professional context. This means that the health care professional understands standard phrases and the most frequent words when it comes to areas that concern him or herself. He follows, reads and understands the most important points in short, clear, simple messages, announcements, texts, letters and instructions. He finds specific, predictable information in these types of texts. The health care professional communicates and engages in short social conversations about simple and everyday tasks that involve a simple and direct exchange of information about familiar topics and activities. There is the option to do the optional part at level A2 or B1.
